

# THERMOFORM

## Brailon Duplicator

The vacuum-forming machine "Thermoform Brailon Duplicator" is a simple, reliable and fast equipment for the production of teaching and educational materials for blind people. Using the vacuum-forming method, this equipment produces inexpensive and durable copies of braille and other tactile originals on solid plastic film.

This equipment will enable you to quickly produce an any number of copies desired. In addition to braille materials, it is also possible to duplicate all kinds of raised illustrations, embossed materials, tactile maps and representations.
