

Braille Labeler

Electrical Label Maker BL-1000

The Braille Labeler allows sighted people to produce transparent, adhesive labels in an easy way. This unit is simple to operate, and there is no need to know Braille as the braille translator is integrated in the software. The Labeler embosses on a 10 m long stripe (13 mm width). If one label is ready, you can cut it with a manual key.

The Braille Labeler is connected to a PC where the text is prepared. You can emboss multiple copies.

When the label is ready, and cut, you can remove the protecting foil and fix it on bottles, tins or on medical products.

Technical Data:

- 6 dot braille
- Embossing Speed 2 Char / Sec
- USB and serial port for PC connection
- power supply 100 / 240 V
- power consumption max 18 W
- weight 0,8 kg
- size 198*120*71 mm
- tape roll BLTP-13A, 10 m

Included in Delivery

- labeler BL-1000
- power supply
- tape roll BLTP-13A
- CD with Software
- USB cable
- serial cable
- manual

System Requirement

- Windows XP or higher

item-No.: HW-54310
