

TSB Lightdesk (Version 2)

The TSB Lightdesk is a tool specifically designed for training visually impaired children to learn to use their residual vision more efficiently. Via IR Remote control the brightness, 20 light colors and 6 light effects can be controlled. The Lightdesk may be either used as a flat work surface or positioned incline in variable levels (20 and 70 degrees). An optional clamping bar will fix the work sheets. Using the magnetset different toys can be mounted on the Lightdesk and moved over the illuminated area.

Supplied with remote control, without case, games and without clamping bar. Are available as accessories.

DERO CARDS Teaching Materials

suitable for children up to five years

Sale in
 Germany
 with
 Brailletec

DERO CARDS Teaching Materials, printed on transparent plastic are designed and provided with simple, clear and attractive for children's designs. They promote the visual abilities of the child. All games use the same motifs, but differ in the levels of difficulty. Focusing on the different forms of play promotes cognitive development.

Ideas and Conceptions: Maria Elvira Dörner, graphic design: Monika de Rouw

Developed in collaboration with: Club Vision Graz - Association for Early Intervention visually impaired, blind and disabled children in addition.
