

TSB Reading Console

The TSB Reading Console was adapted to the needs of visually impaired children and is designed for use at home and at school. As an ergonomic tool, books and sheets can be placed on, so that especially visually impaired children can take a comfortable, ergonomic sitting position for reading and writing.

Due to a generally good accommodation capacity, especially younger persons with reduced vision can achieve an enlargement effect by approaching. Sometimes the sitting posture suffers and additional problems can arise through a permanently incorrect posture. The main aim in the context with children is not to allow these complaints to arise and to ensure a preventive attitude to reading and writing.

The Reading Console can be equipped with a table extension (optional accessory). There is still an extended version of the Console (with lighting) available.

Technical Data

- material: wood
- Size: 545 x 415 x 65 mm
- magnetic surface
- useful carrying handle
- adjustable in several steps
- crossbar adjustable

item-No.: HW-68000
