

TactileView

Graphics Software for Index Printer and Elotype 5

TactileView software enables you quickly and accurately to create graphics, convert them to dot-matrix, and print on our Index and Elotype 5 braille printers. This also applies to previously scanned graphics.

Many different drawing tools are available for creating or editing graphics, such as:

- lines
- rectangles
- circles
- arcs
- ellipses
- texts
- points
- mathematical formulas

System requirement: all current Windows versions

item-No.: HW-15120
