

Braille Labeler

Electrical Label Maker BL-1000 LINK

The Braille Labeler allows sighted people to produce transparent, adhesive labels in an easy way. This unit is simple to operate, and there is no need to know Braille as the braille translator is integrated in the software. The Labeler embosses on a 10 m long stripe (13 mm width). If one label is ready, you can cut it with a manual key.

The Braille Labeler is connected to a PC where the text is prepared. You can emboss multiple copies.

When the label is ready, and cut, you can remove the protecting foil and fix it on bottles, tins or on medical products.

Technical Data:

- 6 dot braille
- USB and Bluetooth 5.0
- power supply 100 / 240 V
- power consumption max 18 W
- weight 0,8 kg
- size 198*120*71 mm
- tape roll BLTP-13A, 10 m

System Requirement

- Windows 7/8/8.1/10 (64/32)
- Processor Intel® Pentium® 1.3 GHz
- 512 MB of system memory
- CD-ROM drive

Included in Delivery

- labeler BL-1000 LINK
- power supply
- tape roll BLTP-13A
- CD with Software
- USB cable
- manual

item-No.: HW-54311
